

PR 1250, an isothermal temperature regulation chromatograph dedicated to online gas analysis

- > Compact & robust, particularly suitable for routine analysis
- > Thermal Conductivity Detector (TCD) in standard configuration
- > Isothermal regulation of oven temperature: from ambient to 180°C
- > PC control (USB link) and user friendly software
- > Valve injection: one or two valves (6 or 10 ports)
- > Additional choice of detectors: FID, FPD
